What is my goal?

Work as React Native Developer.

My resume

I am a Senior React Native Developer with 10 years of experience in software development, capable of working with large and small teams while maintaining a good quality standard and with deep knowledge in WEB and mobile applications development.
I have excellent interpersonal skills, which allow me to communicate effectively and work well in a team, which means I can motivate people and increase productivity. As a React Native Developer, I can plan, build, and deliver quality solutions.
I developed and implemented several features for the areas of insurance, onboarding, banking applications, LMS systems, and urban private transport management systems, among others, obtaining good feedback and contributing to the team to deliver good deliveries.
I have frontend knowledge in Javascript, React JS and React Native, NextJS, HTML, CSS, Firebase, Android, and IOS technologies. I also work in the backend with the programming languages Java, Lambda, NodeJs, and databases PostgreSQL, MySQL, MongoDB, and others.
I also have experience with the Azure DevOps and AWS platforms and worked with the Scrum methodology.

Experiences

Vortigo • Porto Alegre/RS • 04/2022 – 03/2024
